

MINERAL CAST

SUSTAINABILITY

IN OUR MOST BEAUTIFUL FORMS.

SUSTAINABLY BEAUTIFUL. AND BEAUTIFULLY SUSTAINABLE.

Fine. Pure. Natural. Our miracle material – and it all starts with minute particles. With ultrafine quartz sand, a natural, sustainable raw material that enters into an alliance with resins. And which, with the help of superlative production expertise, design and aesthetics, works seamless, flawless wonders: **Rocksolid mineral cast by burgbad.** The perfect solution for our washbasins and bathtubs. An extremely hardwearing material that meets the highest standards, with a character

that never fails to intrigue our developers, design engineers and mould makers, just as it delights our mutual customers on a daily basis.

Find out here what makes Rocksolid mineral cast by burgbad such a fascinating and unparalleled material. Ready for a new experience?

MINERAL CAST

GIVING SHAPE TO VARIETY

At burgbad, we never stop asking ourselves how we can make good and beautiful things even better. Or seeking perfection in perfection. And the material that our washbasin and tub creations are made of is the obvious starting point.

For us at burgbad, the journey to perfection begins with choosing the perfect “ingredients” for our products – and even at this early stage, ecology and sustainability play a crucial role in more

than one respect. In the case of mineral cast, sustainability means **80% raw materials of entirely natural origin** like marble powder and quartz sand. Using the state-of-the-art findings of our own research and cutting-edge production technology, we then combine these natural ingredients with custom-made resins (polyester resin). The result is the perfect material for creating our washbasins as a single entity. In other words, the supporting structure is cast together with the

through-coloured surface so that the washbasin and counter top are joined together in one seamless piece.

And because, unlike ceramic, mineral cast permits extremely flexible processing, the items can be **produced with perfect accuracy, right down to the last millimetre**. For maximum precision and a perfect, true-to-size fit. With no joints, dirt-trapping edges or other factors that might disrupt the sleek appearance of the designs – enabling us to live up to our own exacting standards and create an aesthetically flawless, outstanding product that combines a **long service life** with enduring beauty. And the way we see it, that’s sustainability too.

The material of (bathroom) dreams ...

When visions for groundbreaking bathroom design are combined with a material that can be processed with such unparalleled flexibility, extraordinary results and products become possible. We at burgbad have been proving that for more than four decades – by becoming leaders in the development and production of mineral cast washbasins that set new standards of quality and aesthetics. At burgbad, the manufacturing of our mineral cast material has always been in our own hands. Our development department is continuously experimenting, researching and optimising the sustainable material – enabling us to give beautiful shape to tomorrow's bathroom culture today.

A feel for design

And what does mineral cast feel like? In contrast to ceramic, it is **pleasantly warm and silky-soft** to the touch. With the matt, on-trend surface of our innovative Velvet finish, it feels just as good as it looks. In a nutshell: modern design with an up-to-the-minute matt look and an extremely hardwearing yet sensuously soft finish.

Rocksolid mineral cast by burgbad more than lives up to its name: it is resistant to chemical substances, food safe and disinfectable.

matt Velvet

EASY

CARE

Thanks to its non-porous, hygienic surface, mineral cast is extremely easy to care for no matter which surface finish you choose: **matt Velvet** or **glossy Brilliant**. All you need to clean it is a soft, damp cloth (not microfiber) with a little liquid cleaner (no alcohol or abrasive particles). And in the unlikely event that anything should happen to the **virtually indestructible finish** – and that takes an incredible amount of brute force – scratches, minor damage, burn marks or everyday soiling caused

by e. g. hair dye, nail varnish, coloured shoe care products or coloured pens can easily be rectified by scouring or sanding and then polishing the affected area. We recommend using the burgbad mineral cast repair kit.

All these measures are quite simply impossible with a ceramic surface.

3

FINISHES

MATT IS ON TREND

The unsurpassed quality, workmanship and design of **Rocksolid mineral cast by burgbad** is available in two attractive finishes. With its modern look and pleasantly warm, caressing feel, **smooth matt Velvet** makes you want to reach out and touch it.

With Velvet, burgbad is creating another new milestone that brings the matt look to

bathrooms too. That's good for individual design preferences – and good for sales.

The mineral cast washbasins and bathtubs with a **glossy Brilliant finish** are the well-known classics in burgbad's Rocksolid mineral cast collection.

FEATURES

CONVINCING IN EVERY RESPECT

A truly remarkable material: Rocksolid mineral cast by burgbad. A beautiful combination of technical, practical and aesthetic qualities.

Can a material appeal to common sense just as much as it does to the senses? Yes! See and feel for yourself ...

MATERIAL AND PRODUCT EXPERTISE

- **Cast as a seamless whole – no joins or dirt-trapping edges:**

Thanks to its flexibility, Rocksolid mineral cast permits high-precision manufacturing down to the last millimetre. There's nothing to disrupt the sleek appearance of the products – enabling us to meet the high aesthetic standards we strive for.

- **With mineral cast from burgbad, the material and products come from one and the same source: burgbad.**

- **The eco benefit:**

Rocksolid mineral cast by burgbad is a sustainable material made of 80% entirely natural raw materials.

- **Unrivalled design options & custom-sizing:**

Basins and vanity tops with a length of up to 3.0 metres can be cast in a single, seamless piece – allowing maximum individuality and precision when it comes to designing your customers' bathrooms.

FINISHES

- **High-gloss “Brilliant” finish**
- **Unique “Velvet” finish with a smooth, matt effect –**
a burgbad innovation that brings on-trend matt design to the bathroom.

LOOK AND FEEL

- **Pleasant:**

Warm and smooth to the touch

- **Practical:**

Helps prevent the build-up of dirt and limescale deposits.

- **Durable:**

Rocksolid by burgbad is very hardwearing and resistant to chemical substances.

- **Hygienic:**

Food-safe and disinfectable

5

VARIETY

TEMPTINGLY DIFFERENT

At burgbad, mineral cast means variety: all sorts of beautiful shapes and sizes, angles, edges and curves are possible. **Sit-on basins** or **vanity tops**. With very thin surfaces and precise, filigree edges. Soft and voluminous or striking and

space-structuring – **perfectly custom-sized tubs, one-offs and baths in any shape imaginable.**

For people who want to turn their bathroom into a special place.
